📖 LeetCode

Education

United Institute of Technology, Prayagraj

2024 – Present

Bachelor of Technology, Computer Science & Engineering

CGPA: 7.41

Chandauli Polytechnic, Chandauli

2021 – 2024

Diploma in Mechanical Engineering (Production)

75.6%

St. John's School, Chandauli

2019 – 2020

Intermediate (ICSE)

Experience

InternAlpha Offer Letter

Aug 2026

Data Analytics Intern

- Performed data cleaning, preprocessing and exploratory data analysis using Python and Pandas.
- Developed dashboards and visual reports to transform raw datasets into actionable business insights.
- Supported data-driven decision making through statistical analysis and visualization.

Technical Skills

Technical Skills

Java • Python • JavaScript • React • HTML5 • CSS3 • Tailwind CSS • Node.js • Express.js • FastAPI
• PostgreSQL • MySQL • MongoDB • Supabase • Git

Core

OOPs • DBMS • Computer Networks • Computer Architecture

Final Year Project

SecureNet IDS – AI Powered Intrusion Detection System

View

React • FastAPI • PostgreSQL • Supabase • TensorFlow • CICIDS2017 Dataset

- Developed an AI-powered Intrusion Detection System to monitor network traffic and identify malicious activities in real time.
- Built a FastAPI backend, integrated VirusTotal, AbuseIPDB, URLScan and AlienVault OTX APIs, and engineered network flow features for threat detection.
- Achieved **99.56%** detection accuracy using a Random Forest model trained on the CICIDS2017 dataset while visualizing security events through an interactive dashboard.
- Integrated VirusTotal, AbuseIPDB, URLScan, AlienVault OTX and Google Safe Browsing APIs for automated threat intelligence enrichment.

Projects

🔗 View All

VSBH Cricket League

Code | Live

React 18 • TypeScript • Node.js • Express.js • Socket.IO • Supabase (PostgreSQL) • Docker

- Developed a full-stack cricket league management platform for managing teams, fixtures, points tables and live match updates.
- Implemented dynamic scheduling logic, REST APIs and real-time score synchronization using React, Express.js and Socket.IO.
- Designed a responsive user interface with Supabase PostgreSQL backend to provide an efficient experience for players and organizers.

AI Social Media Post & Caption Generator

Code

Python • Svelte • Google Gemini API • Hugging Face • TypeScript

- Built an AI-powered web application that generates context-aware social media posts and captions from user prompts.
- Integrated Google Gemini API and Hugging Face models while applying prompt engineering techniques to improve content quality.
- Designed an interactive interface using Svelte and TypeScript to automate content creation and enhance user productivity.

Murder Mystery Game

Code

HTML • CSS • JavaScript • PostgreSQL

- Developed an interactive browser-based detective game featuring branching storylines, dynamic clues and multiple endings.
- Implemented event-driven gameplay mechanics and state management using HTML, CSS, JavaScript and PostgreSQL.
- Designed immersive gameplay focused on logical reasoning, player engagement and replayability through multiple investigation paths.

Currency Converter

Code

HTML • CSS • JavaScript

- Developed a responsive web application for converting currencies using real-time exchange rates.
- Integrated a live exchange-rate API and implemented dynamic calculations with input validation using JavaScript.
- Designed a clean, user-friendly interface to provide fast, accurate and seamless currency conversion across multiple currencies.
